The Colorado Springs Industrial Market is off to a Solid Start in the First Quarter of 2019.

The Colorado Springs Industrial market continues to tighten up as we move into 2019 and all indicators are showing that it is a very strong sector in the market. The current conditions, however, are making it much harder for groups to find new locations to purchase or lease whether they are looking to expand, downsize or even move into the market.

The overall Industrial vacancy rate, recorded a rate of 6.8% at the end of the first quarter 2019, which is historically very low and clearly shows that the demand for Industrial space is high throughout the market. This rate is a drop from 7.4% at the end of the fourth quarter 2018 and is the lowest recorded overall vacancy rate over the past 11 years. The Flex sector vacancy rate is lagging at the end of the first quarter 2019 at 13.6% compared to the Warehouse sector which stands at 5.1%.

At the end of the first quarter 2019 the overall net absorption for the Industrial market was recorded at positive 322,991 square feet. The Warehouse and Flex sectors were nearly equal in net absorption through the first quarter 2019, which the Warehouse sector totaled positive 162,105 square feet and the Flex sector recorded positive 160,886 square feet.

The average asking rental rates for the Industrial market has yet again increased through the first quarter 2019 recording \$9.30 per square foot (NNN), which compared to \$8.56 per square foot (NNN) at the end of the fourth quarter 2018. This increase is due to the spike in the average asking rental rate for the Flex sector, which recorded an average quoted rate of \$11.34 per square foot (NNN). This represents a substantial increase of \$1.80 per square foot from the fourth quarter 2018. The Warehouse sector is continuing a steady trend of increases and recorded \$8.33 per square foot (NNN) at the end of the first quarter 2019.

Colorado Springs saw a total of 112,000 square feet of industrial product completed at the end of the first quarter 2019, along with 165,870 square feet reportedly under construction.

There was a total of 32 sales transactions recorded in the first quarter 2019, with a total sales volume of \$28,360,000 at an average price per square foot of \$87.15. The largest transaction that occurred was a large portfolio sale in which two of the properties purchased were Industrial product in the Colorado Springs Market. The two properties totaled 146,304 square feet and sold for a total of \$12,443,211.

Although the overall vacancy rates are low and all other indicators show a strong industrial market, there is still a need for larger users/tenants throughout the market. The total vacancy of contiguous space above 20,000 square feet totaled 1.9 million square feet (53% vacancy rate) at the end of the fourth quarter 2018. This vacancy accounts for approximately 70% of the total vacancy throughout the Colorado Springs Industrial market. Conversely, there continues to be a lack of smaller Industrial product causing a high demand for new construction.
